VENDOR DIRECT SHIPPING FLOW

The marketplace will use a Vendor Direct Fulfillment Model.

Products are shipped directly by vendors to customers.

The Super Admin manages:

- Marketplace operations
- Vendor approvals
- Payments
- Tracking visibility
- Commission management
- Analytics
- Dispute management

The Super Admin DOES NOT physically handle products.

COMPLETE ORDER FLOW

STEP 1 — CUSTOMER PLACES ORDER

Customer selects product from:

- Paithani Saree Section OR
- Designer Saree Section

Customer adds products to cart.

Customer completes payment using:

- UPI
- Cards
- Wallet
- Net Banking
- COD

Order is successfully created.

STEP 2 — ORDER ASSIGNED TO VENDOR

Vendor instantly receives:

- New order notification
- Customer shipping details
- Product details
- Payment confirmation

Notifications sent via:

- Dashboard
- Email
- SMS
- Push notification

STEP 3 — VENDOR ACCEPTS ORDER

Vendor reviews:

- Product availability
- Quantity
- Customer delivery address
- Delivery timeline

Vendor can:

- Accept order OR
- Reject order

IF REJECTED: ↓ Customer notified instantly. ↓ Refund initiated automatically.

IF ACCEPTED: ↓ Order moves to processing stage.

STEP 4 — VENDOR PREPARES PRODUCT

Vendor performs:

- Stock verification
- Saree quality inspection
- Fabric inspection
- Damage check
- Folding and packaging
- Authenticity verification
- Invoice generation

Vendor prepares premium packaging:

- Branded saree box
- Wrapping paper
- Care instructions
- Thank-you card
- Authenticity card

STEP 5 — SHIPPING LABEL GENERATION

Vendor generates:

- Shipping label
- Courier AWB
- Invoice
- Packing slip

Integrated courier partners:

- Shiprocket

STEP 6 — COURIER PICKUP

Vendor schedules courier pickup directly from vendor location.

Courier partner picks up package.

Order status automatically updates:

- Packed
- Ready To Ship
- Shipped
- In Transit

STEP 7 — REAL-TIME TRACKING

Vendor uploads:

- Tracking ID
- Courier details
- Shipment status

Tracking updates sync in real time with:

- Customer Portal
- Vendor Portal
- Super Admin Portal

Customer receives:

- SMS updates
- Email notifications
- Push notifications
- Live tracking link

STEP 8 — DELIVERY

Courier delivers product to customer.

Customer can:

- Confirm delivery
- Rate product
- Review vendor
- Upload product images
- Request return/refund

STEP 9 — RETURN MANAGEMENT

If customer requests return: ↓ Vendor receives return request.

Vendor can:

- Approve return
- Reject return

If approved:

↓

Courier pickup scheduled from customer address.

↓

Product returned directly to vendor.

Vendor verifies:

- Product condition
- Damage status
- Original packaging

↓ Refund processed.

STEP 10 — VENDOR SETTLEMENT

After successful delivery:

System calculates:

- Product amount
- Marketplace commission
- Shipping charges
- Taxes
- Final vendor payout

↓

Settlement transferred to vendor bank account.

SUPER ADMIN RESPONSIBILITIES

Super Admin handles:

- Vendor approvals
- Vendor KYC
- Product approvals
- Order monitoring
- Commission management
- Dispute handling
- Refund monitoring
- Fraud detection
- Analytics
- Marketplace reports
- Customer complaints

Super Admin DOES NOT:

- Store products
- Pack products
- Ship products
- Handle warehouse operations

REAL-TIME SYNCHRONIZATION

Every action must sync instantly across:

- Customer Portal
- Vendor Portal
- Super Admin Portal

Real-time updates include:

- Order status
- Shipment tracking
- Inventory changes
- Returns
- Refunds
- Notifications

IMPORTANT BUSINESS RULES

==========

RULE 1: Vendor is fully responsible for shipping products.

RULE 2: Vendor must maintain premium packaging standards.

RULE 3: Tracking ID upload is mandatory.

RULE 4: All shipment updates must sync in real time.

RULE 5: Vendor handles return verification.

RULE 6: Vendor settlement released only after successful delivery.

ADVANTAGES OF VENDOR DIRECT SHIPPING

==========

- Faster delivery
- No warehouse management cost
- Easier scalability
- Lower operational expense
- Faster order processing
- Simple marketplace architecture
- Better for early-stage marketplace
- Easier vendor onboarding
- Less operational complexity
